

Welcome to Constructing Excellence Dorset Club

A network of over 40 clubs has been established across the UK to bring together forward thinking companies to exchange great ideas and innovation- locally.

This club is an essential resource for all businesses involved in Building and Construction from contractors, sub-contractors, specialists, professionals, educational institutions and clients. Whilst the focus is on sharing best practice, there may be opportunities for new business.

We aim to offer a regular programme of presentations, workshops and visits to demonstration projects that reflect the needs and interests of the existing club members. The success of the Dorset club will be driven by a strong management team of committed members and supported by external agencies such as Business Link Wessex.

Constructing Excellence Dorset Club is focused on supporting members to understand and implement best practice in their own companies in order to deliver real business value.
